

— PORTFOLIO —

SAMUEL P. MALAU

Hello, my name

Samuel Parlindungan Malau

I'm a fresh graduate in Information Technology from the University of North Sumatra. During my time in college, I picked up some basic programming skills and continued to learn to improve on my own.

I am a man who's ready to start my career, work hard, and keep learn new things to achieve mutual success. I'm looking forward to joining a team and developing my skills, especially in IT field, and I'm confident that I can contribute to achieve out company's success.

EDUCATION

University of Sumatra Utara

Bachelor of Information Technology (08/2019-07/2024)

- GPA 3,60/4,00
- Thesis : Citrus Plant Diseases Detection Based on Leaf Images Using You Only Look Once Version 8 (YOLOV8) Method

Programming skill

1. Basic Web Programming, HTML & CSS

[Intermediate]

2. PHP Laravel

[Intermediate]

3. Javascript

[Beginner]

4. RestAPI

[Beginner]

5. Python

[Beginner]

6. Kotlin

[Beginner]

7. C++

[Beginner]

Tools
i use :

<https://bit.ly/CitridxTest> (test)

This application was made to detect three kinds of citrus diseases (canker, mold, and rust) with the implementation of the deep learning method, You Only Look Once version 8, which is implemented in a mobile app built with Kotlin. This application was developed to fulfill my college thesis

> Github Portofolio

[HTML][CSS][Javascript]

This program is a simple application to showcase my portfolio in the form of a website hosted on Github. This website consists of four main sections: About, Projects, Social, and Contact. The website was developed using HTML, CSS, and Javascript with no additional framework

Projects

> MyBookList

[Laravel][Javascript]
[CSS][Bootstrap4]

This is a simple program I developed as an implementation of my study on the Laravel framework. This program has login and registration features, which will create an account that can be used to record a list of books from the user. It will be input by the user manually.

Book Title
Sherlock Holmes : A Study in Scarlet

Author
Sir Arthur Conan Doyle

Description
A Study in Scarlet is an 1887 detective novel by British writer Arthur Conan Doyle. The story marks the first appearance of Sherlock Holmes and Dr. Watson, who would become the most famous detective duo in English literature.

Input result on dashboard

Another feature that exists in this website consists of book search, account deletion, book viewing, and an about section. There's also an admin-level account that can control and view the list of existing accounts. This program is still far from perfect because its purpose is just to learn Laravel, and I hope I can develop it further to sharpen my skills.

> MyNovelAPI

[Laravel][RestAPI]

This is a simple API program that I made as a result of my study on RestAPI using the Laravel framework. The requests that can be made in this book API include get all, get one, post, put, patch, and delete.

```

BookSeeder.php BookController.php 7 X StoreBookRequest.php Book.php UpdateBookRequest.php
p > Http > Controllers > API > BookController.php > PHP > BookController > update()
3 namespace App\Http\Controllers\API;
4
5 use App\Http\Resources\BookCollection;
6 use App\Filters\BookFilter;
7 use App\Http\Resources\BookResource;
8 use App\Models\Book;
9 use App\Http\Requests\StoreBookRequest;
10 use App\Http\Requests\UpdateBookRequest;
11 use App\Http\Controllers\Controller;
12 use Illuminate\Http\Request;
13
14 2 references | 0 implementations
15 class BookController extends Controller
16 {
17     /**
18      * Display a listing of the resource.
19      *
20      * @return \Illuminate\Http\Response
21      */
22     0 references | 0 overrides
23     public function index(Request $request): BookCollection
24     {
25         $filter = new BookFilter();
26         $filterItems = $filter->transform(request: $request); //array yg berisi ['column','operator','value']
27         $books = Book::where(column: $filterItems);
28
29         return new BookCollection(resource: $books->paginate()->appends(key: $request->query()));
30     }
31 }
  
```

> New Fantasy

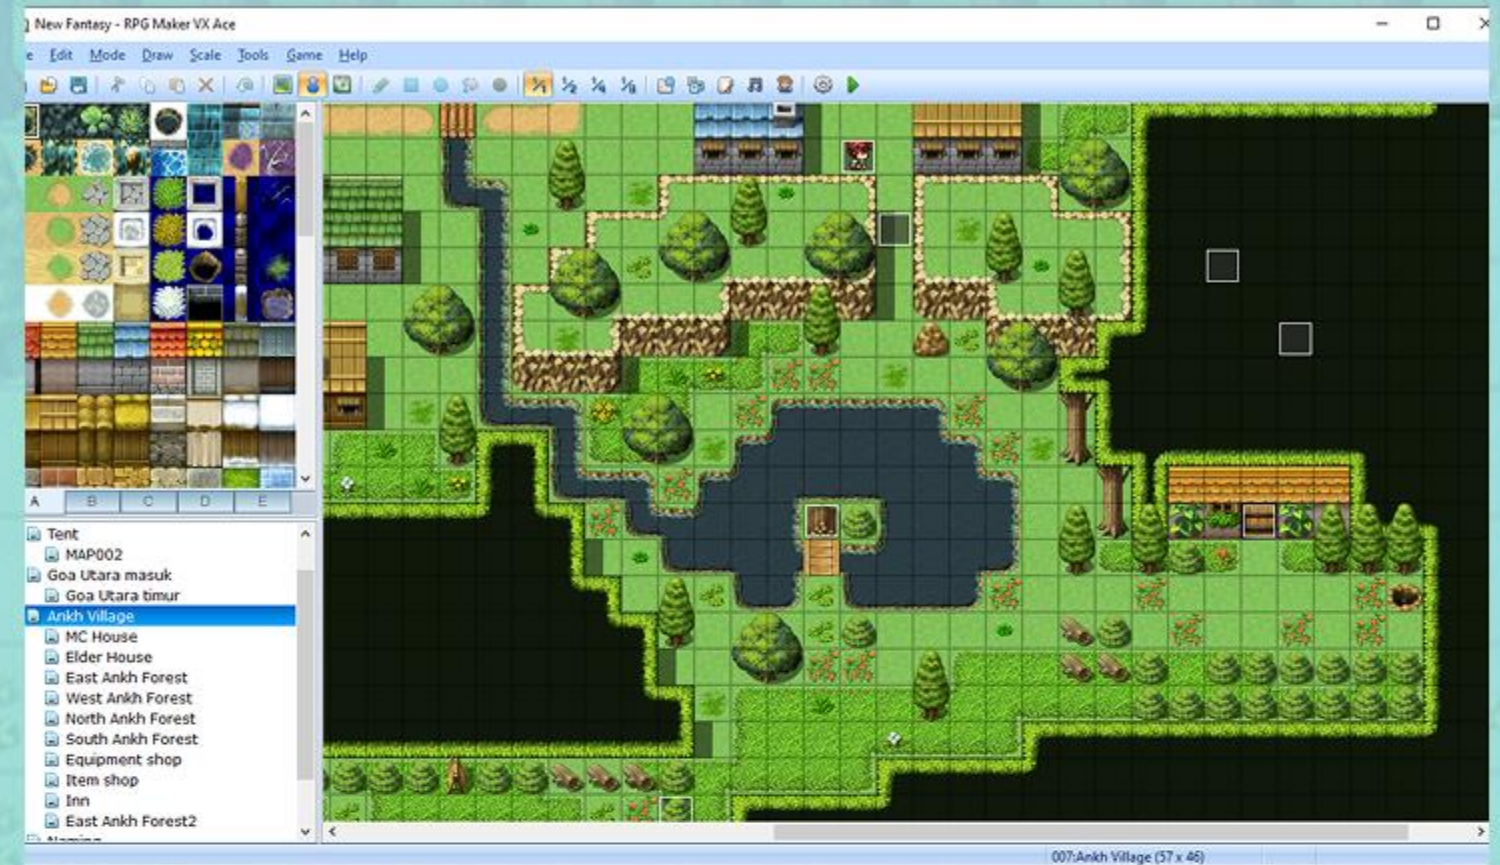

[RPG Maker VX Ace]

This is a game that I made, which is a simple adaptation from a novel I made and developed using RPG Maker VX. This game consists of one chapter of my novel, which is translated from Indonesia to English, with around fifteen minutes of gameplay. Most of the game assets are from the original RPG Maker. The rest of the assets are made with AI and edited with Photoshop, especially the monster and weapon
